

QUICK RELEASE ASSEMBLY

ABSTRACT

Sub
A1 A quick release assembly includes a handle having a key
and a piston having a bore. A cam is held by a cap for
rotation in the bore. One of the opposing ends of the cam
has a keyway that^{is} capable of receiving the key. A catch
assembly is disposed with the key and the keyway, which is
capable of securing the key to the cam in response to
receipt of the key by the keyway.
